2017 Site ID: CHS 1.8 L

Status: Critical

2017 Field Notes: Deep cracking aobserved along the ENTIRE LEVEE; risk of total levee failure; vertical cracking is on both the waterside and landside, eminent slump failure expected.

Site History:

Fall 2018 Notes: Checked for cracking every quarter mile and found multiple deep cracks at each stop. Grass govered a lot of the slope so hard to see. LMA said it filled in many of the cracks. Levee does not seem to be at risk of complete failure. Keep monitoring.

UCIP Comments: 12/06/2016 Crossing has been downgraded from "Urgent" to "Non-Urgent" no signs of leaks observed along pipe alignment (limited inspection on WS toe). According to LMA representative, this crossing was replaced 6 years ago (2010) at WS concrete apron. Recommend conducting internal inspection of pipe through the levee and LS to determine pipe integrity. (O.
